

PRABIN SAH

Dharan, Nepal | saahprabin@gmail.com | +977 9817748194

PROFILE

Third-year Computer Engineering student at Tribhuvan University, Institute of Engineering (Purwanchal Campus), focused on AI/ML, NLP, and web development. Seeking an internship opportunity to apply skills in Python, Django, and React toward building real-world, user-centric products at the intersection of technology and content creation.

PROJECTS

PlacementPrep – ML-Based Resume Analysis & Aptitude Evaluation System

2026

Team project (4 members)

- **Resume analysis:** co-built an AI-powered placement-prep platform with a resume analyzer using spaCy NER and TF-IDF + Logistic Regression for job-role prediction, enhanced with Gemini API recommendations.
- **Testing engines:** developed an adaptive aptitude test (565 questions, Random Forest level prediction) with YOLOv8/OpenCV proctoring, plus a technical assessment engine (200 questions) scored via TF-IDF cosine similarity.
- **Stack:** Django REST Framework, PostgreSQL, JWT auth, React + Vite + Tailwind CSS, FastAPI (ML microservice).

Bujhau – AI Document Simplification Pipeline

2026

- Built a Streamlit-based AI pipeline that simplifies complex, formal English documents into plain language, translates them, and converts the output to speech.
- Individual capstone project spanning NLP simplification, translation, and text-to-speech stages.

AI Shorts Clipper

2026

Live demo: ai-shorts-clipper01.streamlit.app

- Built a tool that transcribes long-form video with Whisper, automatically detects the most clip-worthy 10–20 second highlight moments, and cuts them into vertical, caption-ready shorts.
- Uses OpenCV face-tracking to reframe each clip to 9:16 (instead of a plain center-crop), and a rule-based scoring pass — punctuation, keyword density, speaking pace — to rank transcript segments before cutting.

SKILLS

- **Languages:** Python, C, SQL, JavaScript
- **Frameworks & Libraries:** React, React Native, Django
- **Machine Learning / AI:** scikit-learn, spaCy, TF-IDF, NLP, Computer Vision (OpenCV, YOLO)
- **Design:** Photoshop, Canva, Figma
- **Tools:** Git/GitHub, REST APIs, PostgreSQL

EXPERIENCE

Graphic Design Intern — CyberAlertNepal

3 months

- Completed a graphic design internship, gaining hands-on experience in visual design and graphics production.

Event Organizing — Purwanchal Campus

- Participated in and helped organize hackathons at Purwanchal Campus.
- Organized “ACES TechFest” and “Taranga,” one of the biggest tech events in the Purwanchal region.

EDUCATION

Tribhuvan University, Institute of Engineering – Purwanchal Campus

2023 – Present

Bachelor of Engineering in Computer Engineering — Year III, Part II (6th Semester)
